Your free licence

We're delighted to offer all F-Gas Register members one free desktop licence. And, to top that off, we also have some amazing training packages so you and your team can get the most out of your service management software.

Whether you sign up for the Service Geeni desktop or mobile app, you'll learn how to set up the system in a way that works best for you and your business. Plus, we'll include 3 hours free training*, just to get you started!

What's included in your free desktop licence?

The free desktop licence is an entry-level version of Service Geeni Light. This includes the F-Gas tracking and reporting module as well as an initial session with one of our software consultants. Our experts will provide a 1-hour walk-through of the system as well as a 15-minute discovery call to learn more about our additional features.

Service Geeni Light* Features:

What's included in your free licence:

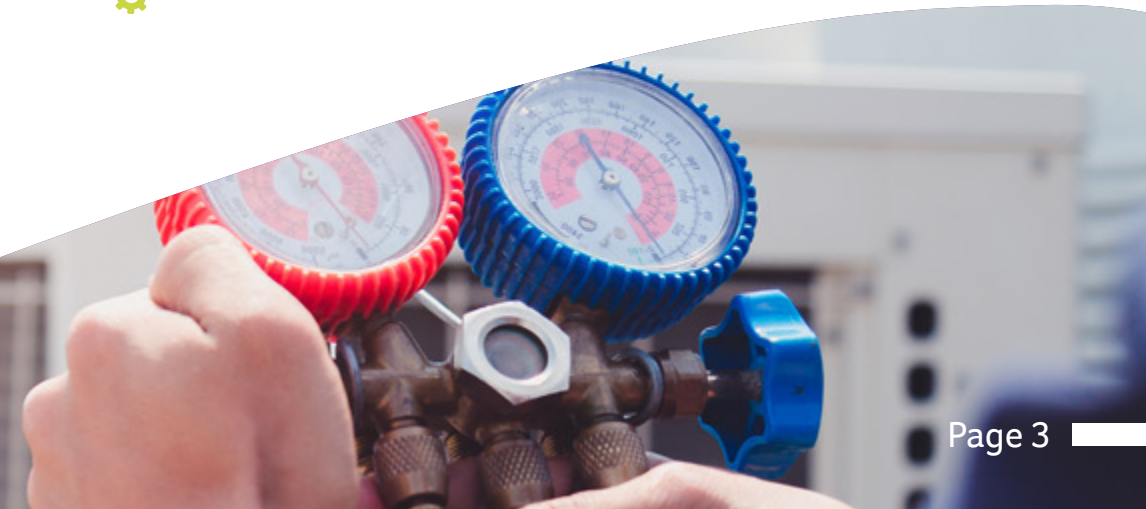

- Service Call (locate site/equipment, view history and raise jobs)
- Job scheduling with job list and diary
- PPM Service Scheduler (Pre-planned maintenance schedules)
- Manage stock on jobs
- Invoicing of jobs
- Standard documents for jobs sheets, invoices, F-Gas documentation.
- Reporting Module

We're here to support you - see our implementation packages below:

Choose from any of our packages below and learn how to...

-  Import data
-  Set up documents
-  Set up test certificates & calibrations
-  Set up cost codes
-  Set up systems for users & engineers
-  Improve current work processes
-  Integrate your accounts software
-  Integrate your ERP

Package 1 – 4 days

This includes 28 hours of software training & support. Typical topics covered in sessions can include: General system training, importing data, setting up cost codes, setting up documents, and how to set up tests certificates and calibration.

Some of the time can also be used by our implementation team if you would rather leave the work to an expert.

Package from £700*

Package 2 – 8 days

This includes 63 hours of software training & support. Typical topics covered in sessions can include: General system training, importing data, setting up cost codes, setting up documents, and how to set up tests certificates and calibration.

Package from £700*

Package 3 - Bespoke Training

Recommended for larger teams that require a more traditional bespoke package configured after the consultation process. This includes a full analysis of your business requirements and training on current work processes, setting up the system for users and engineers, integrating with your ERP and accounting packages, importing data and creation of all required documents, mobile tests, calibration and certificates.

*Exclusive discount applied for F-Gas members. Prices quoted exclude VAT and can only be used in conjunction with the free licence offer.

Register for your free desktop licence & book your appointment with our software consultant

* The free onboarding training includes a consultation meeting with your project manager to discuss all your business requirements and how Service Geeni can help you. This is booked with 2 hours minimum for the session. We recommend at least half of this time is spent on training, however, training is delivered in bitesize sessions, as and when you need it.

*Full access to modules and additional features are available for an additional cost.
